

Content Builder

for Complete **Anatomy**

3D4MEDICAL

Build & Customize

Match your anatomy curriculum by saving the 3D anatomical model in desired orientations, enhanced with custom labels, imported images, 2D & 3D pen illustrations, or text notes. Additionally, teach clinical correlates with cut, fracture, growth, discovery, bone spur, or pain tools.

Share

Save your customized content to personalized groups as interactive Screens, Recordings, and Quizzes, then choose from your content, or material provided by 3D4Medical, to arrange the learning resources into interactive lesson sequences.

Expert Content

Trust the updated terminology correlated to the international standard of Terminologia Anatomica (TA), updated peer-reviewed written descriptions, and a vast library of detailed content in Gross Anatomy, Histology, Radiology, Cadaveric Images, and Clinical Correlates developed by world-renowned anatomists.

Tracking & Assessment

Manage your content and track student performance through our newly-developed web-based dashboard, then export Quiz grades or usage data to your LMS for full curricular integration.

Bring your lessons to life and engage students like never before with Content Builder. Email ContentBuilder@3D4Medical.com for further information.
