e.g. 3<sup>rd</sup> year Ph.D. student, Department Cell Biology & Anatomy, University of Wisconsin

e.g. MS student, Department of Neurobiology & Anatomy, University of Rochester

2<sup>nd</sup> year of Medical School, The Sophie Davis School of Biomedical Education, City College of New York

**Advisor:**

Anthony V. D'Antoni, DC, Ph.D.

**Undergrad/Graduate degree (previous):**

BS/MD dual degree program

**Hometown:**

New York, New York

**Hobbies Special Interests:**

I have been a percussionist for over 10 years.

**Title of Presentation:**

Anatomic Study of the Triangular Fibrocartilage Disc of the Wrist with Surgical Relevance

**Two to Three Sentences on Research Interests:**

I am interested in the impact function and histological properties may have on the endurance and health of the musculoskeletal system. As an aspiring physician, I am also am very interested on studying the dynamic relationship clinical anatomy shares with the health of communities at large. Can one research project focused on a small aspect of anatomy make an impactful contribution to medicine at large? I believe so!
